AZEK Deck's Hazelwood® Named a "Top 100 Product of 2015" by *Professional Builder Magazine*

SKOKIE, IL -- AZEK Building Products today announced that Hazelwood, an AZEK Deck Arbor Collection color, was named a "Top 100 Product of 2015" by *Professional Builder Magazine*. The Top 100 Products were chosen from reader-response figures for new products that appeared in *Professional Builder* from September 2014 through May 2015.

With its sleek, subtle variegation, Hazelwood offers a striking, natural shade with earthy richness. The color was developed specifically to coordinate with current trends seen in hardscapes and other exteriors. Additionally, the lighter color with natural streaking affects will help camouflage dirt. Hazelwood joined the Arbor Collection's popular Acacia®, Morado®, Silver Oak® and Redland Rose® colors in 2014 and immediately gained popularity. This entire Arbor Collection color palette, with a complete range from light to dark variegated options, will work well with any home exterior, rustic or contemporary.

"We are very excited to have AZEK Deck's Hazelwood color recognized by *Professional Builder's* readers," said Jason Grommon, President, CPG Building Products. "It confirms that contractors and their customers are looking for interesting color options that are drawn from nature and reflect light, earthy shades with interesting color nuances. We targeted a very specific look and feel with Hazelwood and we are extremely pleased that it's being recognized as a winner."

In addition to Hazelwood, AZEK's sister brand TimberTech won a "Top 100" spot for its Terrain Collection's Sandy Birch, a capped wood composite with natural earth tones and unparalleled aesthetics in an affordable alternative decking material.

Designed to last beautifully.®
